

Image Engine XS

Quick Guide

Your ideas, visualized.
Generate AI art in single- or multiplayer.

@image_engine_xs_bot

Use it in DM or drop it into your group chats.

SINGLE PLAYER

- Use **/size** to choose a default format, like
- **Just write what you want** to see,
e.g. „A serene mountain lake at dawn“
- **Create on repeat!**
- **Turn on memory** using „/context on“
- **Begin with a core idea**, e.g. „An apple on a table“
- **Then iterate:** „Add a worm coming out of it
The engine will remember the apple — and evolve it.
- Done with that idea? Start fresh with „/reset“

MULTI PLAYER

Anyone can generate an image on the fly — perfect for brainstorming, games, or just adding a visual layer to the chaos.

- Simply use **/img a carrot cake**
- For landscape images write
/land a futuristic city at night
- And for portrait images
/port an 80s horror movie poster
